1	Know and understand the art and science of interaction design, particularly its first principles and key metrics.												
1a	Know and understand how interaction design relates to mental models.					O		/			/		-
1b	Know and understand the five key usability metrics.		+	+		O	O						+
1c	Know and understand interaction design guidelines, principles, and theories.			/							/		/
1d	Know and understand interaction styles.					O	O				/		-
1e	Know and understand affordances.									O	/		-
2	Apply this knowledge by studying, comparing, and evaluating the user interfaces of actual systems.												
2a	Map real-world interaction design cases and/or situations to how mental models are expressed and communicated.			+				/			/		/
2b	Prioritize the five usability metrics for a given application.		+	/									
2c	Effectively use usability metrics, interaction design guidelines, principles, and theories, interaction styles, and affordances to make appropriate, well-founded interaction design decisions.			/							/		/
3	Know the fundamentals behind implementing user interfaces with working knowledge of technologies such as HTML/CSS/JavaScript, Ajax, jQuery, and Bootstrap.												
3a	Know and understand how user interfaces are constructed.					+					+		+
3b	Know and understand event-driven programming.									+	+		+
3c	Know and understand the model-view-controller (MVC) paradigm.									+	+		+
3d	Break down a high-level user action into a sequence of lower-level user or system events.												
4	Follow academic and technical best practices throughout the course.
